How to leave work to its own devices.

ROLLER TRACKS BY G.S. ACE

The roller tracks by G.S. ACE have excellent running characteristics, with quiet and steady mechanical operation even on gentle slopes, and high resistance to impacts. Their great stability guarantees long life. They are available in many versions for varying requirements.

Safe in motion...
So that you have everything under control.

LATERAL GUIDES

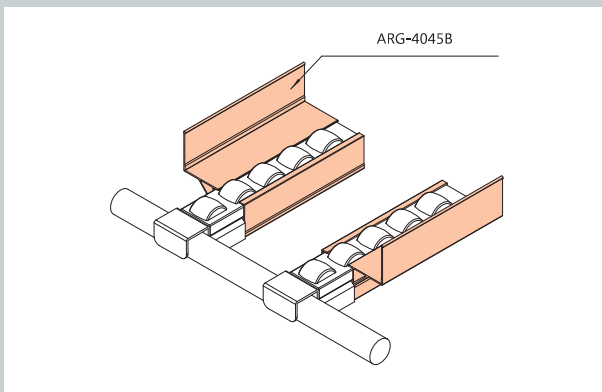

BeeWaTec offers you two types of lateral guides that can be selected depending on customer requirements.

Would you like to use **aluminium** die to increase load-bearing capacity or protect the part by using **plastic** lateral guides?

- **Aluminium lateral guides**
- **Plastic lateral guides**

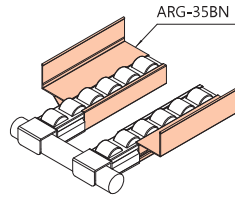

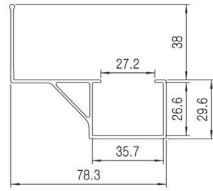

Securely guided with
aluminium profile lateral guides

ALUMINIUM LATERAL GUIDES

- Can conduct electricity
- Increase the load-bearing capacity of castor tracks by up to 100%
- Retain the load in the defined track
- Thus make it possible to clearly separate individual customer products
