

Even if the models may vary, the usage purpose of PPE lockers in offices, at the production, in refectories or gyms is the same. While those in the production prefer full height cabinets or semi-door cabinets, small square cabinets are preferred for personal equipment or protective materials. We have produced narrow cabinets for limited spaces, aesthetic advantage providing Z type cabinets, cabinets with sloping tops in order to prevent in a bad look resulting storage of unnecessary equipments on the cabinets, 2 partitioned cabinets with a single door for a separate storage of dirty and clean goods, and cabinets with sitting banks where the personnel can change their clothes by sitting. Our aim is to prevent a chaotic and bad look at your business place and create clean and tidy personnel areas. You can prefer all our cabinets with key lock, padlock or pin lock. It is possible to add a mirror holder, towel holder or soap holder upon demand.

- + These are lockable PPE lockers for production lines and offices.
- + They have a welded, stable 0.70 mm steel sheet construction.
- + Electrostatic powder coated.
