

## Double Sheet Detection System I20

Double Sheet Detection System for ferrous and non-ferrous material  
Inductive principles

Double sided non contact double sheet control of ferrous and non ferrous material. Additional range of applications become possible in combination with special sensors for part inspection, material inspection and hardness inspection\*.  
4 exchangeable linearized pairs of sensors for double sheet control of 0.05 —16 mm (.001 - .630 inch) sheet thickness.  
4-channel version allows connection of up to four pairs of sensors

### THE ROLAND PLUS

- ▶ All common Fieldbus standards
- ▶ Two types of enclosure available
- ▶ Additional application possibilities

- Suitable for magnetic feeder system
- Calibration by Teach-In procedure
- Digital display of sheet thickness and operational parameters
- Integrated fieldbus interface with process and parameter interface
- Monitoring of over-gauge and under-gauge limit
- Monitoring of operating voltage sensor gaps
- Available as wall mounting enclosure or as front panel mounting

\* Ask for brochures to the additional range of possibilities!

## Description:

Flexible Manufacturing Systems in the sheet processing industry require reliable Double Sheet Control systems in order to protect presses and other sheet processing machines against damage caused by feeding multiple sheets.

The Double Sheet Detector R1000 I20 was specifically developed for this technical environment. Depending on the application (type of material, thickness, sensor gap) the I20 can be used with up to four pairs of sensors. The reliable function of the Double Sheet Detector depends therefore most importantly on the selection of the correct sensors and the mounting of the sensors.

The I20 is based on the product platform R1000 and consists in the standard version of three components:

- a control unit
- one pair of sensors (transmitter and receiver)
- one pair of sensor cables

## Function:

The function of the sensor system is based on the measurement of eddy currents. The sensor system consists of a transmitter and a receiver. The transmitter generates an electro magnetic field, which generates eddy currents in the target. The eddy current loss in the sheet dampens the electro magnetic field. These losses are measured in the receiver and are a measure of the sheet thickness.

## Technical Data:

Operating voltage:	24 V DC +6 V / -2 V
Power consumption:	< 20 W
Class of protection:	IP 65
Ambient temperature:	15°C - 40° C during operation
Weight:	approx. 1.6 kg (3.5 lbs)
Signal inputs:	potential free, 24 V DC with common reference
Switching outputs	
0- 1- 2 sheet:	potential free, open emitter (NPN) of the opto coupler outputs
Switching capacity:	max. 50 VAC, 0.15 A, 0.15 W

## Frontal view of the I20 with enlarged display detail:

1	LED functions
2	Pushbutton functions
3	Program number
4	Type of material
5	Nominal thickness
6	State of measurement
7	Lower limit value
8	Upper limit value
9	Measured value of sensor 1
10	Measured value of sensor 2
11	Measured value of sensor 3
12	Measured value of sensor 4

The measurement results of the pairs of sensor 1 ... 4 are indicated only for pairs of sensor set active

## Control unit I20 with opto coupler interface:

I20-2-O-S-FP / / / / / A B C D E	A	Type of unit	I20	
	B	Number of Sensors	2	Up to 2 sensors
	C	Outputs	O	Optocoupler
	D	Connection	S	Cable pluggable
	E	Enclosure version	FP	

## Control unit I20 with Fieldbus interface:

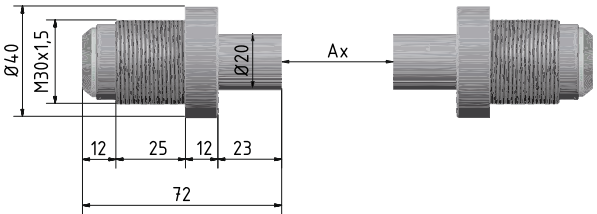

I20-2-xx-S-FP / / / / / A B C D E	A	Type of unit	I20	
	B	Number of sensors	2	Up to 2 sensors
	C	Fieldbus code	XX	Bus code
	D	Connection	S	Cables pluggable
	E	Enclosure version	FP	Front panel mount

**XX Bus Code**  
**PR = Profibus-DP; CN = ControlNet;**  
**DNT = DeviceNet; IN = Interbus-S;**  
**PN = Profinet IO; CP = CanOpen; CC = CC-Link;**  
**EN = EtherNet/IP; ET = EtherCAT;**

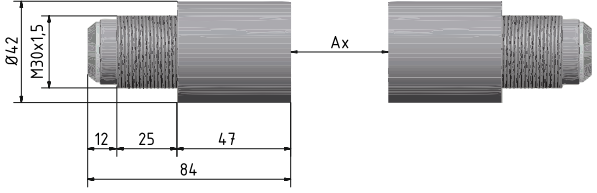

## Sensors:

For performing Double Sheet Detection with I20 the following sensor pairs are required: IS/IE20-30GS, IS/IE42-30GS or ISQ42S / IEQ42S. To perform part inspection, material inspection, or hardness inspection the sensor pair ISQ160S / IEQ160S has to be used.

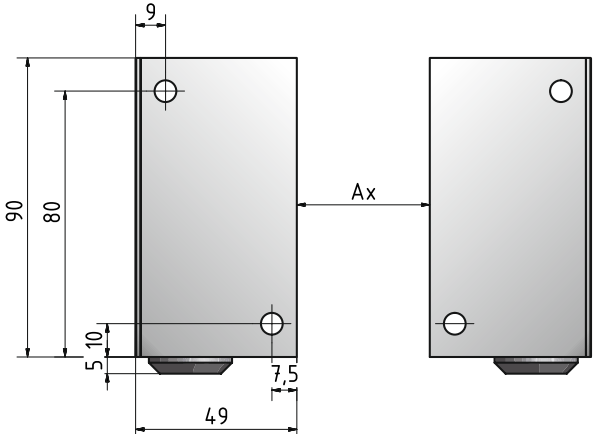

### Sensor pair IS20-30GS / IE20-30GS:

Technical Data	
Application:	Double Sheet Detection
Sheet thickness:	0.05 - 4 mm for steel 0.05 - 5 mm for aluminum (LW 20 - 30 MS/m) 0.2 - 5 mm for austenitic stainless steel
Sensor distance:	see sensor diagrams in the manual
Measurement principle:	Eddy current
Protection class:	IP54
Weight:	approx. 0.25 kg (0.55 lbs)
Material of enclosure:	stainless steel / brass, nickel plated
Sensor cable:	Quick disconnect
	at nominal sensor distance Ax (min. / max.) 20 (10 —40) mm 20 (10 —40) mm 20 (10 —40) mm
	

### Sensor pair IS42-30GS / IE42-30GS

Technical Data	
Application:	Double Sheet Detection
Sheet thickness:	0.15 - 8 mm for steel 0.1 - 10 mm for aluminum (LW 20 - 30 MS/m) 0.4 - 10 mm for austenitic stainless steel
Sensor distance:	see sensor diagrams in the manual
Measurement principle:	Eddy current
Protection class:	IP54
Weight:	approx. 0.45 kg (1 lbs)
Material of enclosure:	stainless steel / brass, nickel plated
Sensor cable:	Quick disconnect
	at nominal sensor distance Ax (min. / max.) 40 (20 —80) mm 40 (20 —80) mm 40 (20 —80) mm
	

### Sensor pair ISQ42S / IEQ42S or sensor pair ISQ42FS / IEQ42FS

Technical Data	
Application:	Double Sheet Detection
Sheet thickness:	0.15 - 8 mm for steel 0.1 - 10 mm for aluminum (LW 20 - 30 MS/m): 0.4 - 10 mm for austenitic stainless steel
Sensor distance:	see sensor diagrams in the manual
Measurement principle:	Eddy current
Protection class:	IP54
Weight:	approx. 0.50 kg (1.1 lbs)
Material of enclosure:	plastic
Sensor cable:	ISQ / IEQ42S: Quick disconnect ISQ / IEQ42FS: 0.2 m cable firmly
	at nominal sensor distance Ax (min. / max.) 40 (20 - 80) mm 40 (20 - 80) mm 40 (20 - 80) mm
	

## Versions of control unit I20, Fieldbus included

<b>I20-2-O-S*</b>	2 channel unit, for max. 2 sensor pairs of same type	Control unit in wall mount enclosure, data backup via USB port
<b>I20-4-O-S*</b>	4 channel unit, for max. 4 sensor pairs of same type	
* also available as front panel mounting, e.g. I20-2-O-S-FP		

<b>Profibus-DP</b>		
<b>I20-2-PR-S**</b>	2 channel unit, for max. 2 sensor pairs of same type	Control unit in wall mount enclosure, data backup via Profibus-DP or USB port
<b>I20-4-PR-S**</b>	4 channel unit, for max. 4 sensor pairs of same type	
** also available as front panel mounting, e.g. I20-2-PR-S-FP		

Other available fieldbus options:  
 CN = ControlNet; DNT = DeviceNet; IN = Interbus; CP = CanOpen; PN = ProfiNet; CC = CC-Link; EN = EtherNet; ET = EtherCAT

## Sensors:

Order information	Description
<b>IS20-30GS</b>	Sensor transmitter 20/40 mm Ø, without cable with sensor plug for sensor cable connection, sensor with thread sleeve M30 x 1.5, 2 flat nuts M30
<b>IE20-30GS</b>	Sensor receiver 20/40 mm Ø, without cable with sensor plug for sensor cable connection, sensor with thread sleeve M30 x 1.5, 2 flat nuts M30
<b>IS42-30GS</b>	Sensor transmitter 42 mm Ø, without cable with sensor plug for sensor cable connection, sensor with thread sleeve M30 x 1.5, 2 flat nuts M30
<b>IE42-30GS</b>	Sensor receiver 42 mm Ø, without cable with sensor plug for sensor cable connection, sensor with thread sleeve M30 x 1.5, 2 flat nuts M30
<b>ISQ42S</b>	Sensor transmitter in cubical enclosure with 50 mm installation height, mounting M6 without cable, sensor with thread sleeve M30 x 1.5, 2 flat nuts M30
<b>IEQ42S</b>	Sensor receiver in cubical enclosure with 50 mm installation height, mounting M6 without cable with sensor plug for sensor cable connection
<b>ISQ42FS</b>	Sensor transmitter in cubical enclosure with 50 mm installation height, mounting M6 fixed cable 0.2 m with sensor plug for sensor cable connection
<b>IEQ42FS</b>	Sensor receiver in cubical enclosure with 50 mm installation height, mounting M6 fixed cable 0.2 m with sensor plug for sensor cable connection
<b>ISQ160S</b>	Sensor transmitter in cubical enclosure with 36 mm installation height, mounting M4 without cable with sensor plug for sensor cable connection
<b>IEQ160S</b>	Sensor receiver in cubical enclosure with 36 mm installation height, mounting M4 without cable with sensor plug for sensor cable connection

## Cable sensor SCI20S-xx:

## Cable:

Order information	Specification	Description
<b>SCI20S-GG</b>	Superflex TRONIC[C]PUR TP 4 x 2 x 0.25 mm <sup>2</sup>	Cable for connecting the sensors
<b>SCI20S-GW</b>		IS / IE20-30GS, IS / IE42-30GS with the I20, both cable ends with quick disconnect, straight cable plug at the unit (GG), resp. angular cable socket (GW) at the sensor side.
<b>SCI20S-GG-TE</b>		Extension cable for SCI20S-GG and SCI20S-GW, as well as for sensors ISQ/IEQ42FS
