

wheels electrically conductive // PUZK-EC

Features:

- PUZK-EC wheel series:
- polyamide 6 wheel body with ball bearing
- tread made of polyurethane, approx. 95° shore A, rounded edges

Properties:

- high load capacity
- low abrasion, non-marking, low rolling resistance
- excellent chemical resistance, oil and grease resistance
- resistant to cutting by metal chips
- the leakage resistance is < 10,000 ohms
- (old designation: PUSKS-ELF)

floors

 **"Electrically conductive, comfortable running movement"**
