

Body Color RAL 5015

Door Color RAL 5015

Product Description

Our 6-drawer cabinet is used for storing and organizing small parts in various sectors such as mold and machinery manufacturing, optics, electrical and electronics, laboratories, logistics, textile machinery, and jewelry.

Product Advantages

Our 6-drawer cabinet is equipped with a central locking system that prevents other drawers from opening when one is in use.

Thanks to the aluminum label channels on the drawer handles, users can place customized labels or symbols to identify the contents of each drawer.

The drawers feature a 97% opening capacity, allowing easy access even to the smallest items at the back.

Since drawer heights increase in 25 mm increments, the number of drawers can be adjusted freely over time according to your evolving storage needs. Use of plastic or metal divider compartments inside the drawers is entirely up to user preference.
