

Body Color RAL 5015

Door Color RAL 5015

Product Description

It is used for storing and preserving materials and spare parts in workshops and factory environments. These cabinets serve as supportive products for organizational practices in facilities applying systems like 5S and lean manufacturing.

Product Advantages

Our industrial cabinet with 4 drawers, a shelf, and a tool hanger panel is designed for storing machine spare parts, measuring instruments, and tools on production lines. Thanks to the espagnolette locking system on the doors, the cabinet is secured with a two-point lock mechanism.

Technical Specifications;

| | |
|-------------------------------------------|---------------------------------------------------------------------------|
| Height | 2000 mm |
| Width | 1010 mm |
| Depth | 615 mm |
| Design | Welded |
| Material | DKP Sheet Steel |
| Coating | Electrostatic Powder Coating |
| Paint Thickness | 70-80 microns |
| Shelf Load Capacity | 120 kg |
| Maximum Total Load Capacity | 600 kg |
| Number of Shelves | 2 |
