

Body Color RAL 5015

Door Color RAL 5015

Product Description

It is used in production and assembly lines for transporting and storing auxiliary materials. It can also be used for moving medium-sized parts within the production area.

Product Advantages

Our work cart, equipped with 12 drawers and a cabinet with one shelf, enables effortless transportation of medium-sized materials within production areas without physical strain. It also provides storage for related spare parts and hand tools.

The number of drawers can be increased upon request, and the tabletop can be optionally covered with PVC, galvanized sheet metal, or stainless steel sheet metal.

Thanks to the built-in fluorescent light and electrical channel, the product can serve as a mobile workstation for small-scale assembly and quality control tasks.

Technical Specifications;

Height	2035mm
Width	1700mm
Depth	600mm
Design	Welded
Material	Dkp Sheet Steel
Coating	Electrostatic Powder Coating
Paint Thickness	70-80 microns
Maximum Total Load Capacity	300kg
Number of Shelves	1
Shelf Material	1mm Galvanized Sheet Steel
Shelf Height Adjustment Increments	50mm
Weight	240kg
Lock Type	Central Locking System
Product Type	Mobile Workbench

Body Specifications

The cabinet side panels and back panel are made from 1 mm thick DKP sheet metal, while the top cover and bottom panel are made from 1.2 mm thick DKP sheet metal. All parts are assembled using the spot welding method.

Drawer Cabinet Specifications

The drawer body and back panel are manufactured from 1 mm thick DKP sheet metal, while the drawer front panel is manufactured from 1.2 mm thick DKP sheet metal.

Hanger Panel Specifications

Manufactured from 1 mm thick DKP steel sheet.
