

wheels electrically conductive // EGA-EC

Features:

- EGA-EC wheel series
- die-cast aluminum wheel body with ball bearing
- tread made of elastic solid rubber, approx. 65° shore A, strong solid rubber cushion

Properties:

- high elasticity with low rolling resistance
- runs quietly
- sturdy and shock-resistant
- absorbs vibration
- electrically conductive
- the leakage resistance is < 10,000 ohms
- (old designation: f3 elf)
